WELCOME TO EMI FOUNDATION

The EMI (Ecosystem of Medical Informatics) platform is aims at achieving the following three objectives. That is the system that realizes improvement of medical science by guaranteeing the safety, security & interoperability of medical information and aggregating the data using big data analytics and artificial intelligence on the Blockchain platform We are convinced that this new medical infrastructure that the EMI platform creates will increase the life span of the people around the world.

1. Secured Sharing of Medical Information with complete traceability
2. Aggregation of Medical Information from multiple sources
3. Utilizing medical information for Big Data Analytics & Artificial Intelligence

EMI-Wallet User Manual

A Person who want to become a member of EMI-Foundation, person needs to register with our wallet. Then that person get permitted to interact with our wallet and utility tokens.

To register as a user into EMI-foundation wallet person need to open his/her desktop/Laptop browser, from browser in URL bar he/she need to enter our wallet address https://www.wallet.emi-foundation.com as shown in below figure.

Welcome to the emi-foundation

Hi Venkata Naga Lokesh Chittari

Thanks for joining us.

Let's get started by clicking on the link below to confirm your email address:

Confirm Email

If you experience any problems (or issues), please paste the above URL into your web browser.

Always here if you have any questions, **The EMI Foundation Wallet Team**

© 2018 emi-foundation

On clicking confirm mail User will be redirected to Wallet Dashboard. That means User successfully registered with EMI-Foundation. And User will be seeing this below dashboard page on his browser.
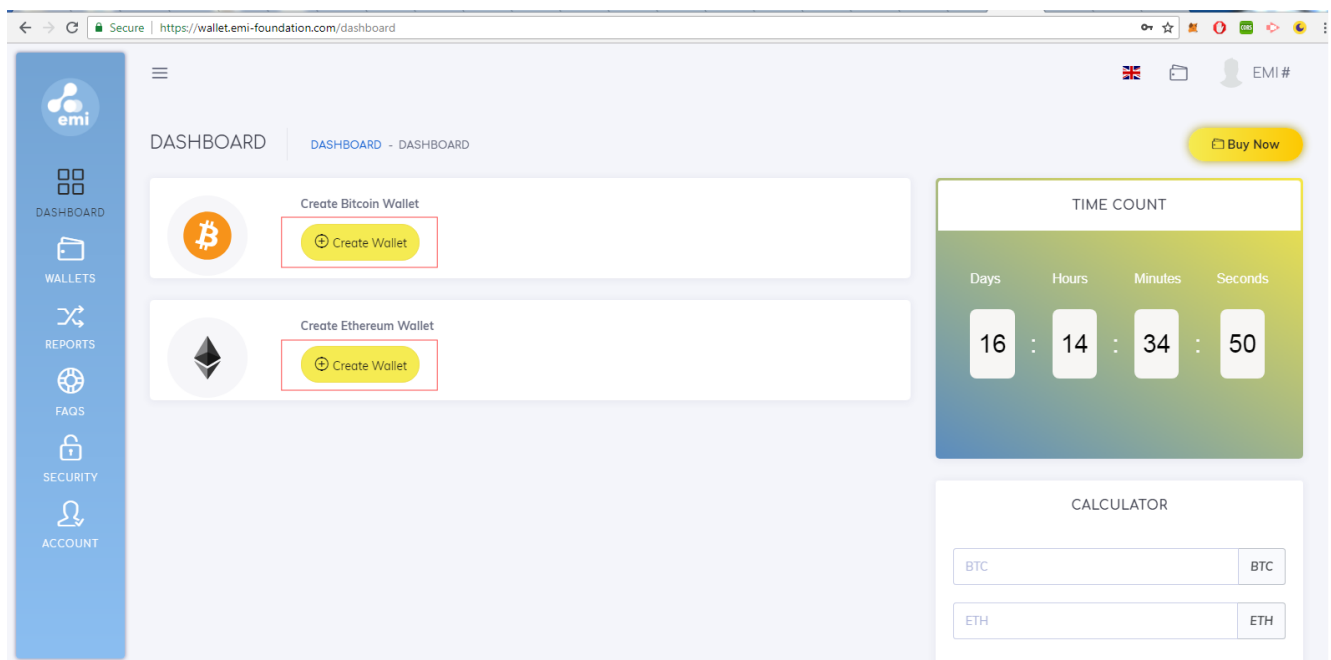

User need to create wallet in our organization, for that we offer two of main crypto accounts. That are Ethereum and Bitcoin. Now registered User need to create his own Bitcoin/Ethereum wallet to buy our EMI tokens. As in above image highlighted with red circle. On clicking either of the option user will get this below shown popup to create his wallet.
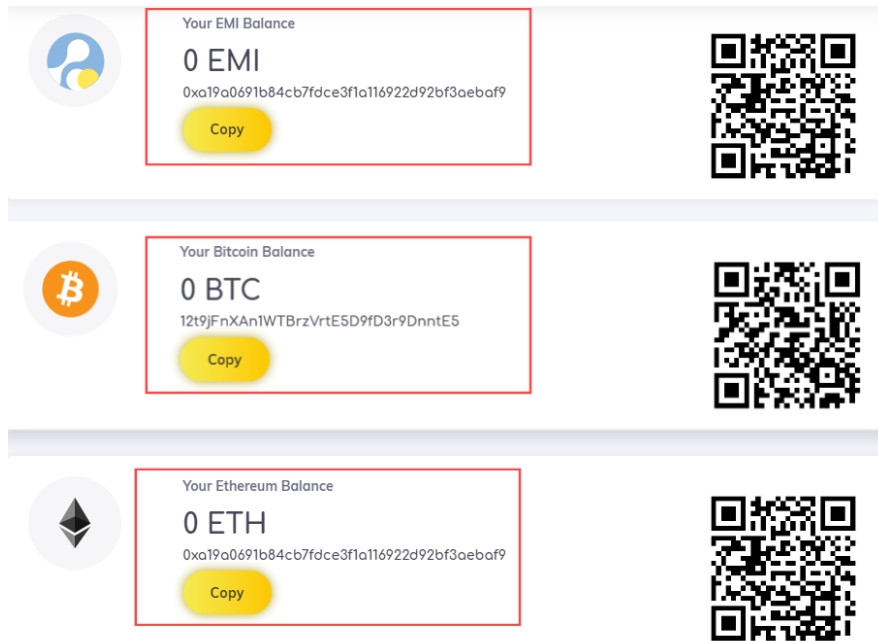

Example of Ether wallet:

Here User need to create one separate password for his/her wallet and then clicking submission, our system will generate new account for his/her use. User need to be cautious about remembering password. Because for each account separate passwords will set.

On creation of any one wallet he can still create other one wallet. For example user created ether wallet then bitcoin wallet also can be created if he wish to buy EMI tokens from both the currency.

Once you creating wallets your dashboard will shows you three accounts separate balances on screen. That were Ether, Bitcoin and EMI.

Your EMI Balance

0 EMI

Copy

Your Ethereum Balance

0 ETH

0xa19a0691b84cb7fdce3f1a116922d92bf3aebaf9

Copy

Now user need to deposit ethers or bitcoins from outside to this wallet accounts. Once they got balance then dashboard facilitate them a calculator to check our token values for given crypto equivalent. User can take the help of it to decide on how many EMI tokens he/she can get by buying the appropriate value of their currency.

Below image is a demonstration of calculating 1 Ether to check emi's equivalent tokes. However User cannot go beyond minimum value. But there is no limit to reach maximum. On this calculator user can also see its equal value in bitcoin.

CALCULATOR

| 0.0422004 | BTC |
| 1 | ETH |

=

| 1000 | EMI |

Bonus (15%)

| 150 | ⚡ |

Total Tokens

| 1150 | 🛒 |

minimum purchase: 125 EMI

The discounts are timely changes. To know more on please read our whitepaper. For quick reference look here is the table of discounts

ICO	BONUS
8/27 = 0.001 ETH	15%
8/28 = 0.001 ETH	5%
8/29 = 0.001 ETH	–
9/13 = 0.0012 ETH	10%
9/14 = 0.0012 ETH	3%
9/15 = 0.0012 ETH	–
9/20 = 0.0014 ETH	–
10/1 = 0.0015 ETH	–

Once user got clarity on EMI token values then they can go for buy EMI tokens. User can either select on "Buy EMI" or click on "Buy Token" to

navigate page. As we below marked in the image. Once user clicks on that then he will be asked to enter the amount of value to purchase our tokens and his wallet password to proceed.

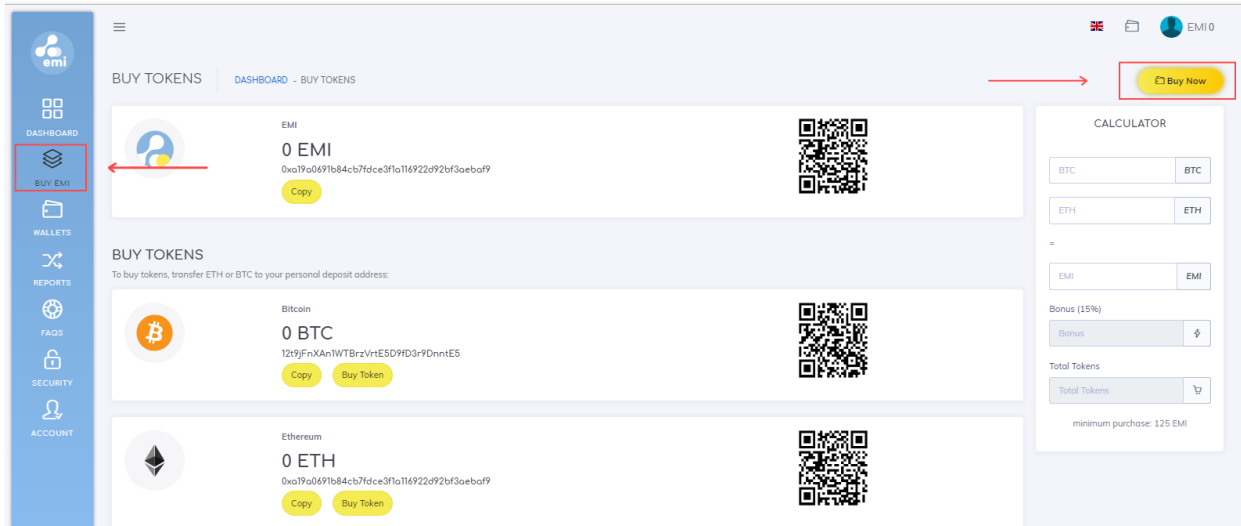

Once user clicking on this he/she will be redirect to another tab where he/she find buying option. The below image is the one where user can see buy option to buy the emi tokens. On Clicking Buy token on respective account the emi tokens will be deposited by deducting the type of currency you selected
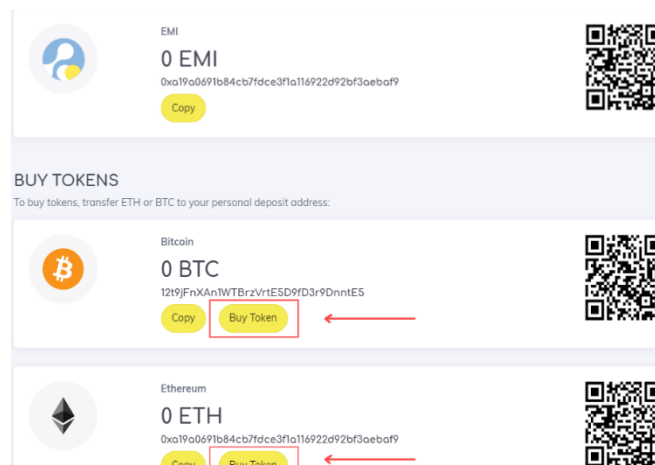

How to Buy EMI tokens:

User on clicking "Buy EMI" he has three ways to purchase them.

1. **By Ether Wallet**: If user wish to buy by ethers then he need to click Buy Token option below his ether account address as encircled in red.
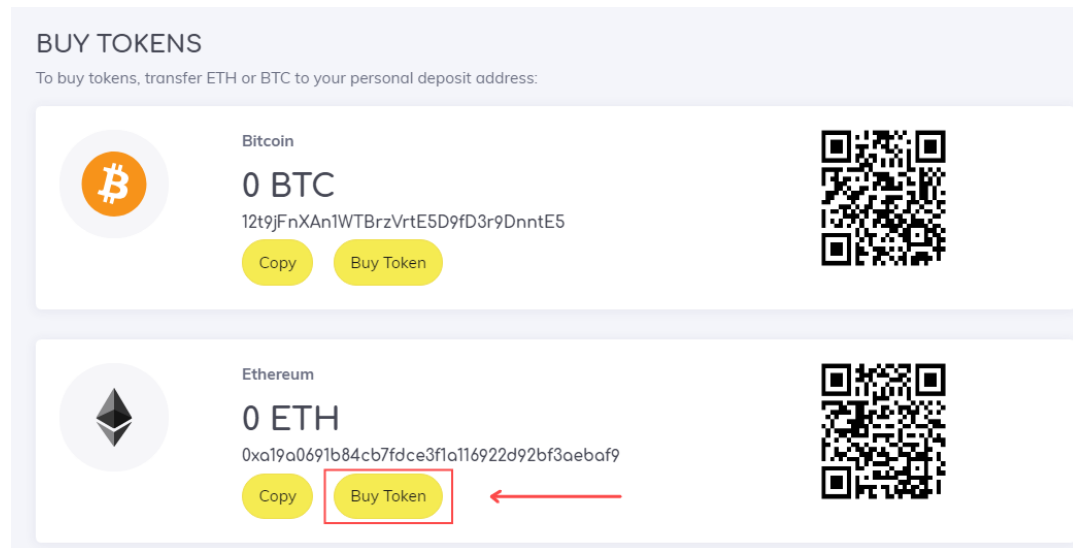

On clicking buy token the he gets one popup page asking his account permission and amount to purchase the order.

The below figure shows the form of fields it required to transact. Below are the steps:

1. First user need to enter the amount in ethers he wish to spend for purchase EMI token.
2. Next field shows the equal amount of EMI tokens automatically calculating itself on entering ethers.
3. User need to enter his wallet password
4. Then buy token button to transact.

On clicking Buy tokens user will be get hash value of the transaction to track the transaction status. Later the transaction

will be listed into transaction history where user can see them anytime. Once your transaction made confirm by the system then the EMI values will be updated in the dashboard automatically.

BUY WITH ETHEREUM   ✕

Ethereum 0 ETH

FEE   [0.000099]   E   Password   [   ]   🔍

                                                              Buy Tokens

The calculator uses the effective EMI price, which is based on the price 1 EMI = 0.001 ETH and 15% bonus.

4 STEP GUIDE

1. Calculate how much tokens you want to buy.
2. Enter number of ETH or EMI you want to purchase
3. Upon transaction confirmation, you will see EMI tokens in your wallet balance.

2. **By Bitcoin**: If user wish to buy them by bitcoin he need to click on bitcoin account as we shown in the below picture.
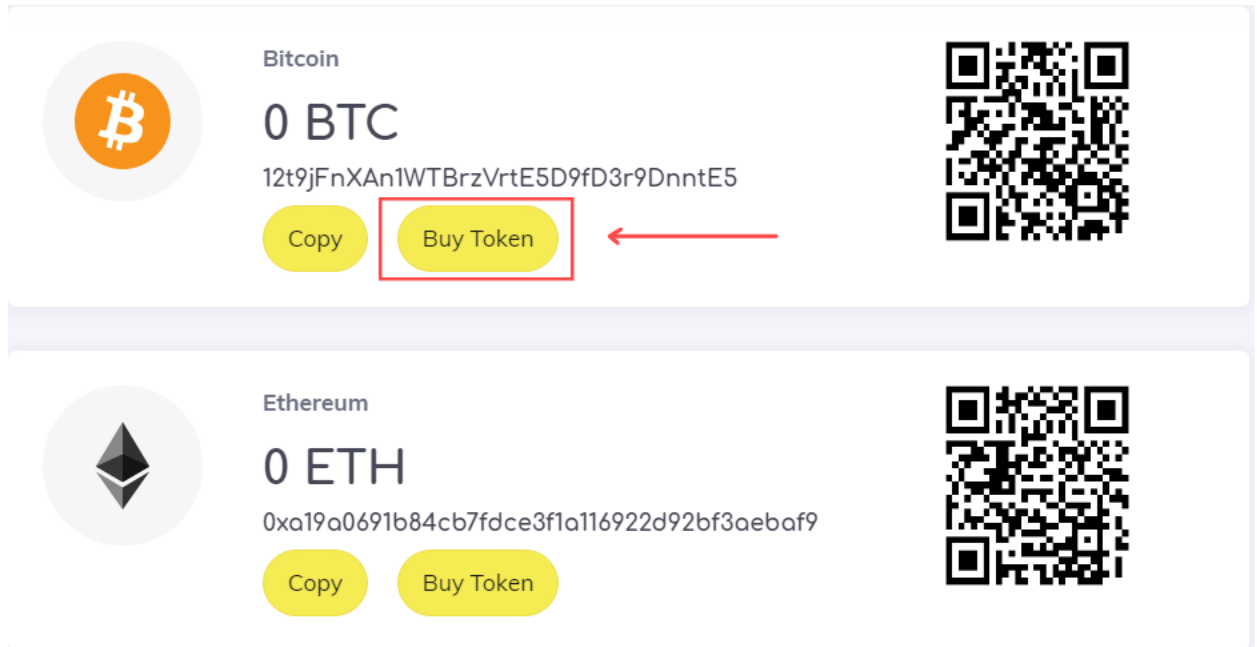

To buy EMI make sure you have bitcoins in created wallet to proceed.

On clicking that you get following screen to enter your amount and password details as shown in this.

Here also you need to folllow the 4 steps to buy EMI tokens

1. Enter the bitcoin value to place your EMI order
2. Confirm its equal value of EMI tokens in next box
3. Enter your bitcoin wallet password.
4. Click on buy tokens button

On clicking this you'll get hash value that can be used for tracking your order status.

Once your order is placed successful then within an hour your EMI token value will be updated.

3. **By Altcoins:**
   Since for buying EMI we currently accept only ethers and bitcoins. Though we have some other list of supporting alternate coin that we offer user to exchange them to ethers from our website. User can select their choice of coin to convert to Ethers then by that converted ethers user could purchase EMI tokens. Below are the steps to follow for purchase.

   1. Select your alt coin to transfer, by click on its below button 'buy ethers' as shown in below picture.

BUY ETHERS USING ALTERNATE COINS
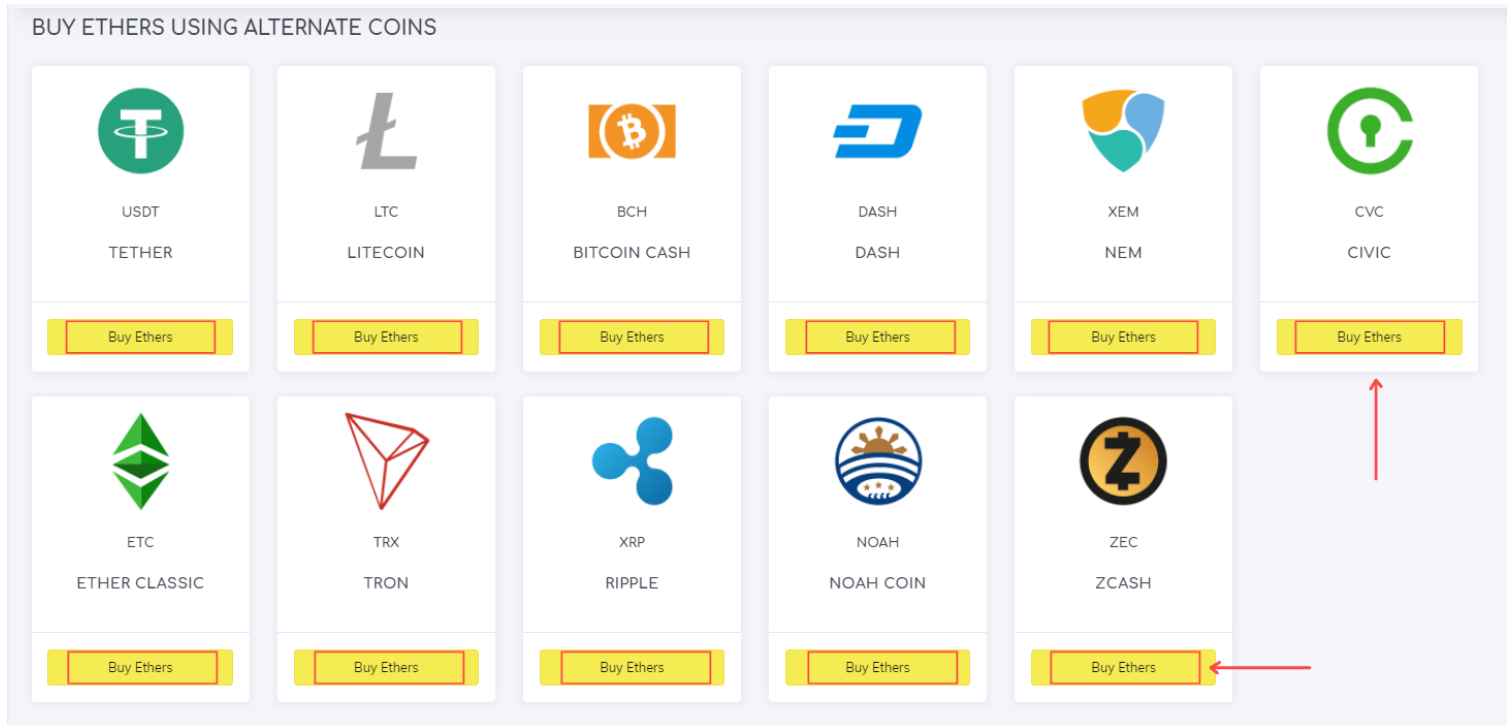

2. On clicking Buy Ethers you will get following screen to enter amount you wish to spend for purchase ethers. Below is the screen of ripple value as example showing you the process of conversion.

In order to convert your altcoins to Ethers you need to follow steps as we gives below.

I.   Enter the number of altcoins you want to spend

II. Click on 'check' button to know its equivalent value of Ethers and EMI value, on confirming value if you wish to proceed then,

III. Click on Exchange button.

EXCHANGE RIPPLE TO ETHER

Ripple XRP

minimum purchase: 125 EMI

YOU HAVE

1000 → XRP

⇄ Check

EMI Tokens : **1171.11**

Bonus Tokens : **175.67**

Total EMI with (**15%**) bonus : **1346.78**
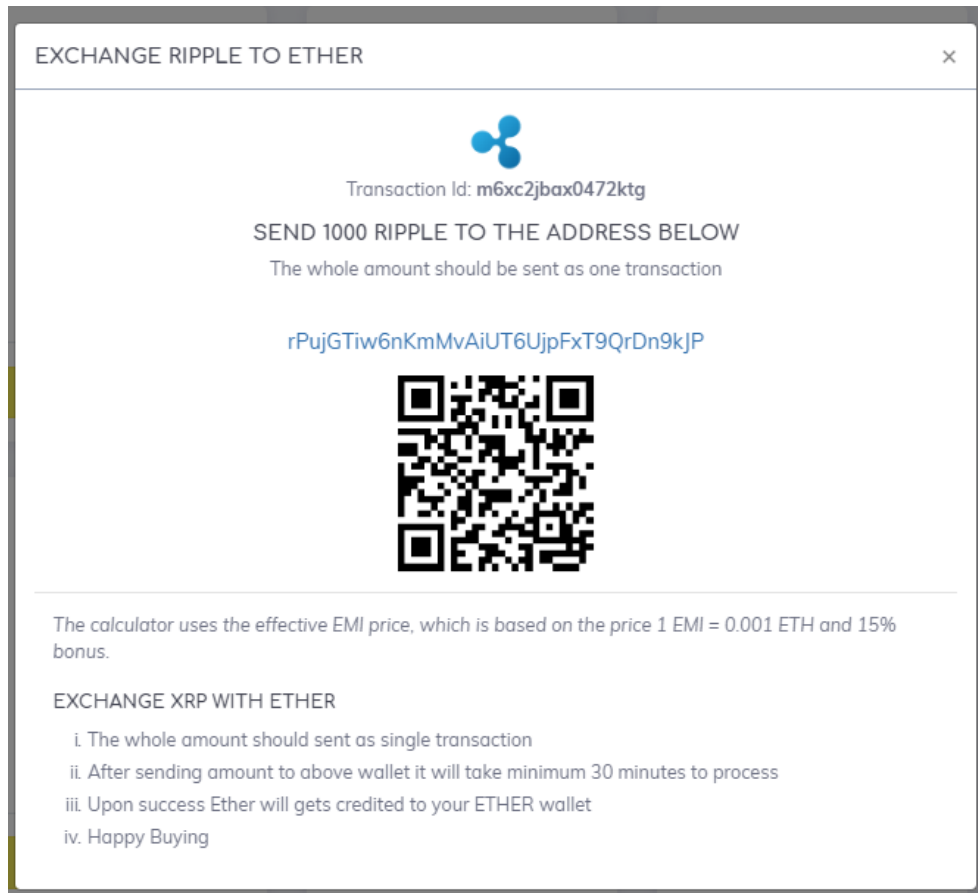

YOU GET

1.171115 → ETH

Exchange

The calculator uses the effective EMI price, which is based on the price 1 EMI = 0.001 ETH and 15% bonus.
